

DRINKING WATER PURIFICATION SYSTEMS

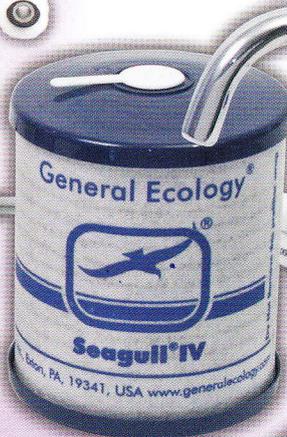

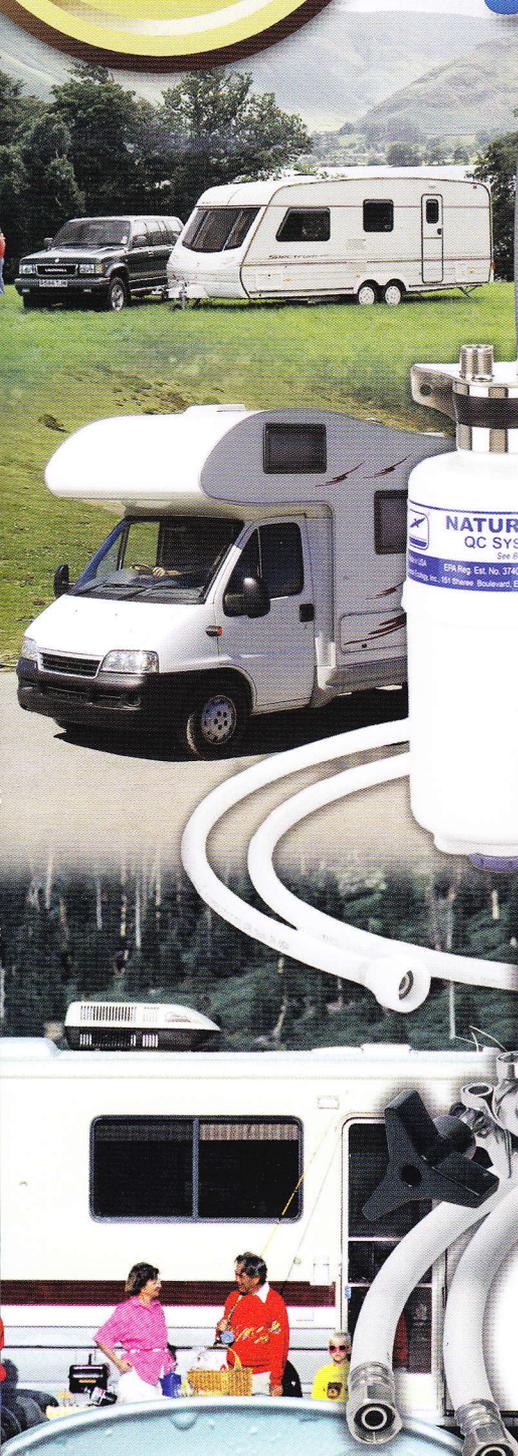

**AS USED
BY MAJOR
AIRLINES
WORLDWIDE**

*suitable for most
caravans & motorhomes*

Recommended by

- Purifies water instantly
- No chemicals or electricity needed
- **BOTTLED WATER QUALITY** straight from tank
- Compact & simple maintenance
- Removes bacteria, cysts & viruses
- Quick change

the difference is

clear

General Ecology Europe Ltd

THE PURE SCIENCE OF SAFE WATER

Here's how Seagull®IV's "Structured Matrix™" purifies your water and protects you without using chemicals:

Ultrafine Microstraining - places an ultra-fine protective barrier (0.1 micron) between you and water-borne bacteria, cysts and larger particles - removing these contaminants.

With products that rely on pesticides, you consume the dead organisms including the dissolved toxins and pesticides added to the water. Worst of all, pathogenic cysts like Giardia and Cryptosporidia, the most frequent causes of water-borne illnesses, *are not killed by ordinary chlorination or iodination.*

With Seagull IV purification systems, micro-organisms and their toxins are removed.

Molecular Capture - traps and holds organic and specific other chemicals such as pesticides, herbicides and solvents as well as chlorine and other trace contaminants that can be toxic and / or carcinogenic and produce foul tastes and odours. Seagull IV water is deliciously refreshing and healthy tasting... it tastes like water should taste!

Electrostatic Removal - uses specially produced space-age surfaces, much like magnets, to remove minute particles and colloids suspended in the water.

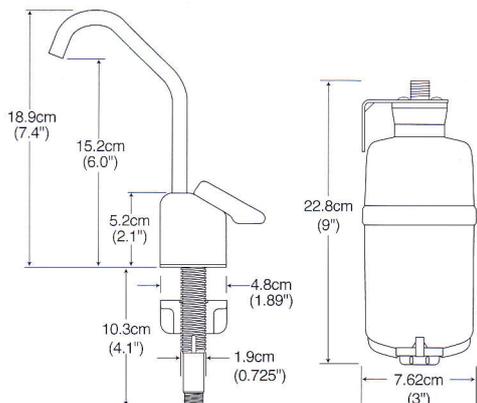

These purification mechanisms all work together to naturally and ecologically remove contaminants from your drinking water. With Seagull IV, you don't have to drink chlorine or other pesticides to gain protection.

Easily Installed - Top mounting PURE WATER tap and "Quick and Easy™" installation hoses eliminate the need to work in the dark recesses under your sink.

Low Cost, Foolproof Operation - Operates solely from your pressurized water system and requires no chemicals, post treatment storage tanks, cartridge brushing, brines, wastewater lines or electricity.

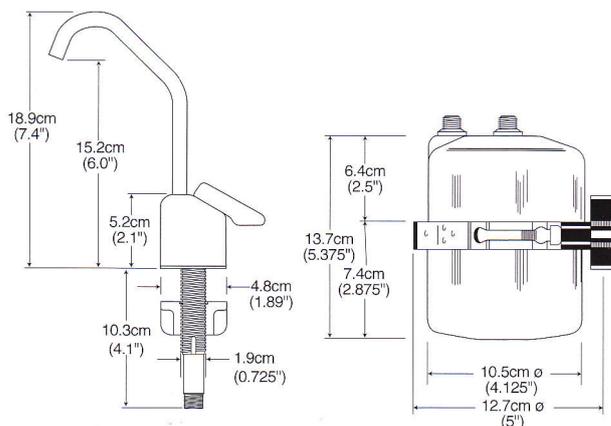

General Ecology's drinking water purification systems are designed to make your water safe, convenient and delicious. They work without chemical additives and without electricity, no waste water and no hold time. Being instantly effective against all three classes of contaminants - including specific chemicals, parasitic cysts, tastes, colours and odours.

*Intended for COLD WATER USE.
For Motor Home, Marine & Home use.
Does not de-salinate

Technical Specifications for Nature Pure® QC2 System:

Max Operating Temperature	100°F (38°C)*
Flow Rate	0.8 Gallon/min (3 Litres/min)
Capacity Avg.	800 Gallons (3,000 Litres)
Operating Pressure	25 psi - 100 psi
Particle Retention	0.4 Micron
NPQC2 Basic System	P/N 420043
NPQC2 Replacement Canister	P/N 420420

Technical Specifications for Seagull®IV X-IF:

Operating Temperature	33°F - 145°F (0.5°C - 63°C)*
Flow Rate	1.0 Gallon/min (3.8 Litres/min)
Capacity Avg.	1000 Gallons (3800 Litres)
Operating Pressure	25 psi - 125 psi
Particle Retention - Micron	0.1 Nominal (0.4 Absolute)
Complete Unit	P/N 701017
RS-ISG Replacement Canister	P/N 788000

For RV and Marine Use
E.P.A. Est. Reg. No. 37403-PA-01
Patented in the U.S.A., International Patents Pending
All health claims and offers not in compliance with local or state laws are hereby withdrawn. ©,™ Trademarks of General Ecology, Inc
